Reliable Nursery Stock
Since 1872

J. Bagby & Sons Company
New Haven, Missouri

The Way We Do Business With You

Sixty-two years have been spent in building up our nursery business at New Haven. It was established in 1872 by Julian Bagby and has continued under **Bagby** management ever since. All of the trees we offer are grown on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with **Bagby** quality trees. This list contains only the standard, time-tried and tested varieties.

Our years of experience in the nursery business has taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. **We produce good stock, true-to-name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.**

Terms Cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied by one-fourth the amount in cash. Remit by Money Order, Cash or Check. When cash is sent be sure to Register the letter.

Order Early It is important that you order early. For the benefit of customers who wish to order early, but do not care to spare all of the money when the order is sent, we will accept early orders if 10 per cent of the amount is sent with order, and we will reserve the stock for you. Balance to be sent when you order the stock shipped.

Directions for Ordering Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When varieties named cannot be furnished, we reserve the right to substitute such varieties as will fill the season as nearly as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when stock arrives you will know exactly whether or not you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

Prices The prices are for the quantities named, but five, twenty-five and seventy-five will be supplied at ten, fifty and hundred rates respectively—i. e.: five at half the price of ten; twenty-five at half the price of fifty, and seventy-five at half the price of one hundred.

The prices in this list are for the goods **F. O. B. New Haven, Missouri.**

15% additional must be sent when you wish your stock shipped by parcel post. Any amount not used for prepaying packages will be refunded. If no money is sent for postage, then shipment will go by express COLLECT. Owing to postal regulations trees larger than 3 to 4 feet cannot be sent by parcel post.

Packing All goods are packed free. Notwithstanding this fact, we use the utmost care and pack all orders, large or small, according to the distance and our customers' best interests. **Everything is correctly labeled.**

Our Guaranty The fact that nurserymen, planters and fruit growers of the country have ordered of us year after year, is as good a guaranty as can be given by any other nursery of sixty-two years' standing. If a mistake occurs we will cheerfully correct it. **We use the greatest care possible to have our stock true-to-name,** and should any prove not true, we stand ready to replace it free of charge, or to refund the purchase price, but it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for any sum greater than the amount originally paid for said stock. **We guarantee stock to reach customers in good condition.**

All shipments will be accompanied by **Certificate of Inspection of the State Entomologist.** Good stock, **true-to-name,** sold direct to the planter at reasonable prices is our aim.

We solicit correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

Our Location NEW HAVEN is on the Missouri Pacific Railroad and also on the Missouri River, sixty-seven miles west of St. Louis. Our soil is the very best for producing well-ripened stock with splendid roots. Our facilities for prompt shipments are first class.

Our Shipments Our shipments go to practically every State in the Union. We do not claim you should plant "**Bagby-grown stock** or none at all," but we do want to impress on you the fact that there is **NONE BETTER.**

Notice A recent ruling by the Express Companies, changing the classification of Nursery Stock, will mean a saving to you of about 25% in Express. This in most cases, makes Express just as cheap as Freight.

APPLES

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. No better trees can be found anywhere.

Double worked Grimes Golden 5c per tree extra.

BENONI—One of the best summer sorts. Red striped. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE (Red June)—Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBURG (Russian)—Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

LIVELAND RASPBERRY—Fruit good sized, clear, waxen, white striped and marbled crimson; flesh snow-white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight-resistant, bears early, makes a good filler.

YELLOW TRANSPARENT—One of the best early apples. It is extremely hardy. Fruit is yellow with a smooth brilliant skin. Flesh is white, fine grained, sub-acid. Tree is a straight compact grower and is often used as a filler.

Fall Apples

GRIMES' GOLDEN—Medium to large; rich golden-yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place. Often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

GOLDEN SWEET—Large pale yellow. Very sweet.

MAIDEN'S BLUSH—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

WEALTHY—An apple of fine appearance and quality; an early and profuse bearer; a good market apple of its season. Tree hardy. Ripens here in August. Winter apple North.

Winter Apples

Delicious

BEN DAVIS—Fruit medium to large; red striped; flesh white; an excellent variety. Tree very hardy; a free-grower, coming into bearing early and very productive. December to March.

DELICIOUS—A remarkably popular variety, and rapidly taking first rank both for commercial and home orchards in all the apple-growing sections of the country. Fruit large, nearly covered with dull dark red; fine-grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

GANO—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as

a stand fruit; flesh white. Annual, early, prolific bearer.

GENETON (Rawles' Janet)—Medium, roundish, greenish-yellow, striped with red; rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

GOLDEN WINESAP—A very large golden yellow apple with red cheek. It is a very heavy bearer and an excellent keeper. One of the best cooking apples.

HUNTSMAN'S FAVORITE—Originated in Johnson county, Missouri. Very large; golden yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

INGRAM—Very similar to Geneton, but tree is more upright grower and apple is not subject to crack. Size medium; striped bright red in the sun. Flesh greenish-yellow; agreeable, sub-acid flavor. Good keeper. Tree hardy, late bloomer, very productive.

JONATHAN—One of our earliest and best bearers. Brings fancy prices. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid flavor. Succeeds everywhere. A firm apple, crisp, tender and juicy. A great commercial apple and a splendid family sort.

MAMMOTH BLACK TWIG—Closely related to the Winesap, but fruit is very much larger and has a very deep red skin. It is an excellent shipper. Its keeping qualities are equal to the Winesap. The tree is a fine upright spreading grower, thriving in almost any soil or climate.

ROME BEAUTY—Large, yellow shaded with red; tender, juicy, sub-acid. October to February.

Rome Beauty

Winter Apples-Continued

STAYMAN WINESAP—Fruit is very large, and of a deep red color. Flesh firm, tender and juicy. It is a wonderful apple for both the home and commercial orchard. Tree is a strong grower and very heavy producer. We recommend this as one of the finest of the winter apples.

WINESAP—Few apples have enjoyed the popularity of the Winesap. It is deep red in color, fine flavor and keeps exceedingly well in storage. Fruit is medium size, but takes a high polish and is always in demand. It is an exceptionally heavy and regular bearer. The tree will succeed in almost every soil and climate.

WINTER BANANA—Fancy market fruit; large, pale yellow, pink blush. Tree a strong grower.

YORK IMPERIAL—This apple has been gaining favor, and is being planted largely as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

VISIT OUR NURSERIES during growing, digging or storage season.
We welcome you at any time.

Saline Co., Mo., March 28, 1933

I received my Apple trees and they are such fine trees. I am well pleased with them. I expect to order from you again soon.

WM. BOCKSTETTER.

Crab Apples

Prices for Crab Apples are the same as for other apples.

TRANSCENDENT—Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after. and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp. Skin yellow, striped with red. September to October.

WHITNEY—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

Peaches

We are "Headquarters" for **True-to-Name** Peach Trees, and can supply the best **up-to-date market sorts**. Our Peaches are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy peach stocks and free from any disease. Remember this when comparing prices with other establishments.

5 — 7 ft. Extra Large60	5.00		

Early Varieties

ALEXANDER (White Free)—Large size, handsome and regular in form, with deep maroon shade; adheres to stone; should remain on the tree until fully ripe. Early in July.

CARMAN (White Semi-cling)—Large with beautifully mottled red cheek. A valuable home or market sort. Season about fourteen days later than Alexander and about three weeks earlier than Elberta. Our stock came from the originator, and is true to name.

GREENSBORO (White Free)—Large, oblong. Tree vigorous, prolific; grown largely in Georgia and the South for Northern markets. One of the best early sorts. Ripe June 25th.

MAMIE ROSS (White Free)—Large, white, almost covered with carmine; juicy, and of good quality. One of the best for family use and probably the best early commercial variety.

MAYFLOWER (Red Semi-cling)—A beautiful "red-all-over" peach; handsome and of splendid quality. Extremely early. Tree hardy and healthy. Ripens here June 20th.

RED BIRD CLING (Early Wheeler) (White Cling)—One of the very best of the early peaches. The tree is hardy, a good grow-

er and very productive. Fruit is a creamy white with a red blush. A splendid shipper, and commands good market prices.

Elberta

Mid-Season Varieties

BELLE OF GEORGIA (White Free)—Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Early Crawford.

CAPTAIN EDE (Yellow Free)—Originated on farm of Capt. Ede in Illinois. Splendid yellow freestone variety. In appearance is very much like Elberta, its equal in every way, except not quite so large; better quality.

CHAMPION (White Free)—Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy-white, with red cheek. August 15.

CRAWFORD'S EARLY (Yellow Free)—This beautiful yellow peach is highly esteemed for market purposes. Fruit medium, oblong; skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent. Last of July.

CRAWFORD'S LATE (Yellow Free)—Fruit of the largest size; skin yellow, or greenish-yellow, with dull red cheek; flesh yellow; productive; one of the best freestones. August and September.

CHINESE CLING (White Cling)—A most popular peach; shape is oblong, has creamy skin with faint flashes of red. August.

ELBERTA (Yellow Free)—A Georgia cross between Crawford Early and Chinese Cling; very large; well colored; all things considered, the finest yellow free-

stone in cultivation; no one can go amiss by planting it; the fruit is perfectly free from rot, and is one of the most successful shipping varieties. August and September.

ELBERTA CLING (Yellow Cling)—Flesh firm; excellent shipper. Tree strong grower and productive. Looks just like Elberta, but a perfect cling stone.

J. H. HALE (Yellow Free)—Similar in shape to the Elberta, but averages a little larger. Flesh fine grained of excellent flavor and a perfect free stone. Ripens a few days after Elberta. It is a wonderful peach for either home or commercial orchard, as it is very productive and a good shipper.

HILEY (White Free)—Ripens last of July. Yellowish-white skin with deep red cheek. Flesh is white and very juicy. Large size.

MILLER CLING (White Cling)—An extra large clingstone. Hardy, productive, and of best quality. Earlier than Heath Cling, but larger and better color.

OLD MIXON CLING (White Cling)—Large, white flesh, with deep red cheek; rich and good; one of the best. August.

ROCHESTER (Yellow Free)—Ripens ahead of Early Crawford, but is of the same type. Long season and an excellent home orchard variety. Flesh firm, juicy and rich.

SOUTH HAVEN (Yellow Free)—Fruit large, round and of uniform size. Color deep yellow with red cheek. Very hardy.

A Cluster of Peaches

Late Varieties

COLD DUST—Large yellow clingstone; juicy, productive and of best quality. September 1st to 10th.

HEATH CLING (White Cling)—Large oblong, creamy-white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

HENRIETTA (Levy) (Yellow Cling)—Magnificent yellow cling, large size, slightly covered with bright crimson; hardy, productive, always commands fancy prices. September 25th.

KRUMMEL (Yellow Free)—Skin yellow, overlaid with a crimson blush. The fruit is nearly round and quite large. Flesh is fine grained and has a delicious flavor. September 10th to 25th.

OCTOBER BEAUTY (Yellow Cling)—Late yellow cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow cling.

RINGGOLD CLING (White Cling)—Much larger than Heath, and in every way an improvement on that popular kind. A very valuable peach. September.

Cherries

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals; they are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well-drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

BLACK TARTARIAN—Sweet. Large size, meaty and good. Productive. Last of June.

ENGLISH MORELLO—Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian or Early May)—Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD—One of the best sweet cherries, very large, white with pink cheek. Juicy, rich and delicious. Tree healthy and a great bearer. May and June.

MONTMORENCY—One of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size, fine flavor, and of bright, clear, shining red; valuable everywhere, especially for Northern latitudes; larger than Early Richmond, and fully ten days later. Season, end of June.

ORDER EARLY

Place your order early. Our business is crowded into a few weeks time but if we have your order before the rush starts, we can reserve the stock for you. In this way you are more sure of getting all the varieties you want. If you wish you need send us only 10% of the amount with your order and you can send the balance when you want your stock shipped.

ABUNDANCE—A hardy, productive Japanese sort. Large, purplish-red; quality very best. Season, early in July.

BLACK BEAUTY—The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance. Originated with us.

BURBANK—Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.

GERMAN PRUNE — Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

For the Home Orchard, plant Abundance, Burbank, Black Beauty and Shropshire Damson.

RED JUNE—One of the largest Japanese varieties; ripens before Abundance. Tree upright, vigorous and hardy.

SHROPSHIRE DAMSON—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the Common Damson; enormously productive. Last of September.

WILD GOOSE—Large, rich, crimson, beautiful; flesh soft, melting delicious, with a full fruity flavor. Tree a strong grower, prolific.

Spraying

Spraying is a vital necessity if you want GOOD Fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life

The Spraying program ordinarily resolves itself into two, three or four applications, one while trees are dormant with DENDROL, and the others on blossoms and fruit with VERDOL. All applications must be guided by careful study.

Spraying will pay bigger dividends than anything you can do. Anything that is worth having is certainly worth taking care of.

BORERS WILL ATTACK FRUIT TREES IN SPITE OF ALL WE CAN DO, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

habits of enemies, often only two to seven days are available for any one spraying. Do the work then. put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand pump can.

DENDROL Dormant Spray Oil

Dendrol Dormant Spray Oil is a miscible or soluble oil which as delivered for use is a transparent oil of clear reddish color. Upon mixture with water it forms a milky-white emulsion.

Dendrol is designed to be used as a dormant spray for the control of injurious insects overwintering in one stage or another upon shade trees, shrubbery and fruit trees. Some of the most important of such insects that Dendrol will control satisfactorily are San Jose Scale, Oyster Shell Scale, Scurfy Scale, Elm Scale, and many other scale insects; also Red Mite, Leaf Rollers, Aphids, Pear Pyslla, Case Bearers, and others.

Dendrol is so made that it forms a uniform mixture in the spray tank; that is, every part of the mixture is equal in the proper oil strength to every other part. This is very important from the standpoint of uniform dependable insect control and safety to the trees. Dendrol mixes easily with all kinds of water and can be stored for long periods. This makes it easy to save money by buying enough for several years.

Dilutions Recommended.

	Dendrol	Water
San Jose Scale	2	98
Oyster Shell Scale	6	94
Scurfy Scale	3	97
Aphids	3	97
Red Mite	4	96
Leaf Roller	8	92

VERDOL Summer Spray Oil

It is a white creamy substance thicker than Dendrol but fluid enough to be poured readily.

It is always uniform in composition and quality.

It will not deteriorate or separate in storage and is not easily affected by freezing.

It mixes readily and completely with all kinds of water.

It is especially effective in the control of Codling Moth but will also help in the control of Scale, Red Spider, Aphids, Plant Bugs and many other injurious insects.

It combines perfectly with Arsenate of Lead, Calcium Arsenate and Zinc Arsenate.

Do not use Verdol in the Calyx (petal fall) spray.

Do not use Verdol with Lime Sulphur or Sulphur at any time.

Dilutions Recommended.

Codling Moth and most other insects use Verdol at 2% or Verdol at 1% and Nicotine 1-1600.

Send for Complete Spray Schedule.

Protect Your Trees And Shrubs

During The Hot Dry Summer By Using
The Water Lance

Save on your Sprinkling

The Water Lance puts the Water and Fertilizer where they will do the most good. Does as much in two minutes as could be done in two hours by sprinkling. Very easy to use and is a great water saver.

A growing Tree or Shrub is very valuable and, in one dry season, the Water Lance should pay for itself time and again by saving your plants.

Send for yours at once.

If you wish this sent by Parcel Post, add 10c for Postage.

Dogzoff

DOGZOFF is a highly concentrated Spray, inoffensive to humans, harmless to plants and animals, yet effective in correcting their bad habits. Can be used in keeping dogs off chairs, swings, out of

flower beds, and from digging up the lawn, etc. It is also effective for Cats and Rabbits. One spraying will be adequate for from 4 to 5 weeks.

DOGZOFF is applied with any small insect sprayer and one application usually does the work.

It is put up in bottles containing a season's supply for the ordinary home. Use it on your Evergreens and all your Shrubbery.

Price 69c Prepaid.

Office of the Chief Plant Officer
Jefferson City

CERTIFICATE OF NURSERY INSPECTION

No. 121

Issued Oct. 17, 1933.

THIS IS TO CERTIFY that, in accordance with the provisions of the Missouri Plant Act, the nursery and premises thereof belonging to New Haven Nurseries of New Haven, Mo., have been duly inspected by an authorized inspector and were found to be apparently free of injurious insect pests and plant diseases.

This certificate is not transferable and may be revoked for cause. This certificate expires September 1, 1934.

K. C. SULLIVAN, Chief Plant Officer.

We are prepared to fumigate all consignments to states requiring fumigation. No Scale or Yellows has ever been found in our establishment, and we take pride in sending out only clean, healthy stock.
